AlmaMater Studiorum

2009 - 2017

PROFILE

I am a (data) nerd, with lot of passion and some strange choice along the way. Data analyst by day, aspiring data wizard by night! I love using data to understand the world, but I do not want to stop here. My passion for data and desire to expand my skillset has led me on a quest to become a data scientist. I'm a fearless problem solver with an insatiable curiosity. I'm always seeking new challenges and opportunities to learn and grow. Let's make some magic with data!

When I don't stare to lines of code or spreadsheet, I like to read and play video game or spend quality time with my dog.
